

Professional Summary

Software Engineer with a strong foundation in backend development and programming fundamentals. Experience working on academic projects building and testing backend systems using Java (Spring Boot) and Node.js, with a focus on clean code, documentation, and maintainability. Curious, proactive, and eager to learn from senior engineers while contributing to real-world, scalable systems.

Education

BACHELOR'S DEGREE IN COMPUTER SCIENCE – National University of Quilmes March 2022 - Present

Progress: 49.8% · GPA: 9.0/10.0

UNIVERSITY DEGREE IN COMPUTER PROGRAMMING – National University of Quilmes March 2022 - Present

Progress: 82.9% · GPA: 9.0/10.0

Certifications

FULL STACK WEB DEVELOPMENT – Fundacion Pescar August 2025 - December 2025

Training in Interpersonal Skills (81 hours) – Training in Full Stack Web Development (219 hours)

Projects

LINKEDUNQ, UNIVERSITY JOB PLATFORM – Academic Project August 2025 - December 2025

- Designed and developed modular backend APIs using NestJS and TypeScript, integrated with PostgreSQL for data persistence.
- Applied data structures and algorithms to optimize job search and filtering functionality.
- Collaborated in a Git/GitHub-based workflow, participating in code reviews and team discussions.
- Implemented unit tests with Jest to ensure reliability and maintainability of backend services.
- Worked alongside frontend development using React, ensuring smooth integration between client and server.

ENTITY MANAGEMENT APPLICATION – Academic Project March 2025 - July 2025

- Developed backend services in Java Spring Boot and Node.js, applying Object-Oriented Programming and Design Patterns.
- Built and maintained REST APIs, focusing on clarity, performance, and scalability.
- Implemented relational and non-relational persistence (PostgreSQL, MongoDB, Redis, Neo4j).
- Implemented unit tests to ensure code quality and reliability.
- Applied layered architecture and best practices for data management and validation.
- Collaborated with teammates, participated in code reviews, and documented features and decisions.

Work Experience

ADMINISTRATIVE AND OPERATIONS ASSISTANT – La Bicicleta Naranja December 2023 - Present

- Managed and maintained operational data with a focus on accuracy and consistency.
- Coordinated information across teams to support daily operations.
- Documented processes and workflows to improve efficiency.
- Developed strong organizational, communication, and problem-solving skills.

Skills

- Languages: Java, TypeScript, JavaScript
- Backend: Spring Boot, Node.js, NestJS
- Frontend: React, Vite, Tailwind CSS
- Databases: PostgreSQL, MongoDB, Neo4j, Redis
- Testing: JUnit, Mockito, Jest
- Tools: Git, GitHub
- Methodologies: Agile, Scrum
- Fundamentals: Object-Oriented Programming (OOP), Data Structures, Algorithms, Software Design Principles, Concurrent Programming

Languages

- English: Intermediate (B1)
